

BACKUP POWER FOR MEDICAL REFRIGERATORS AND FREEZERS

Medi-Products delivers healthcare providers trustworthy, customized, and space-saving solutions for protecting refrigerated pharmaceuticals from loss caused by power failures

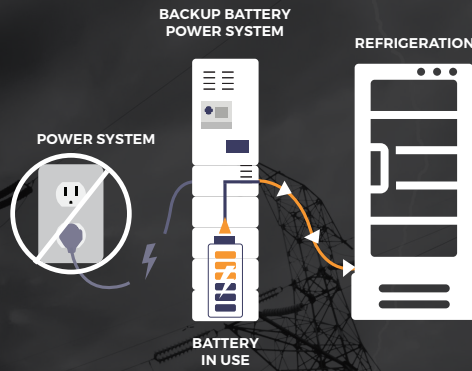

How It Works

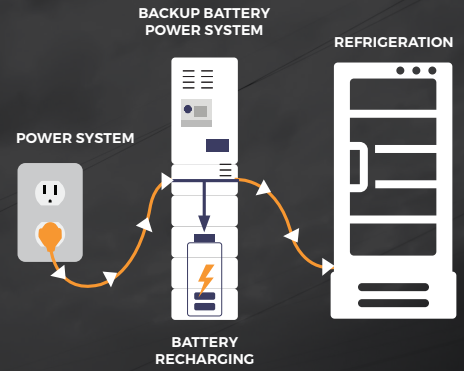

Standby Mode

Power Outage Mode

Recharge Standby Mode

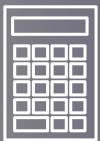

Flexible Solutions

Our modular cabinet design can be tailored to meet the backup power requirements of any refrigerator or freezer. Deploy emergency power solutions for a few hours or several days.

Identify the power that is required

Determine system based on required power

Consider options for the desired runtime

Power Outage Alert System

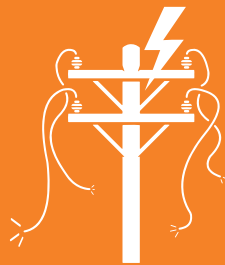

Receive automatic alerts for:

- Utility power failure
- Low battery power

Calls up to 4 phone numbers

Landline, Internet, or cellular service

No Medi-Products subscription fees

Our Product Line

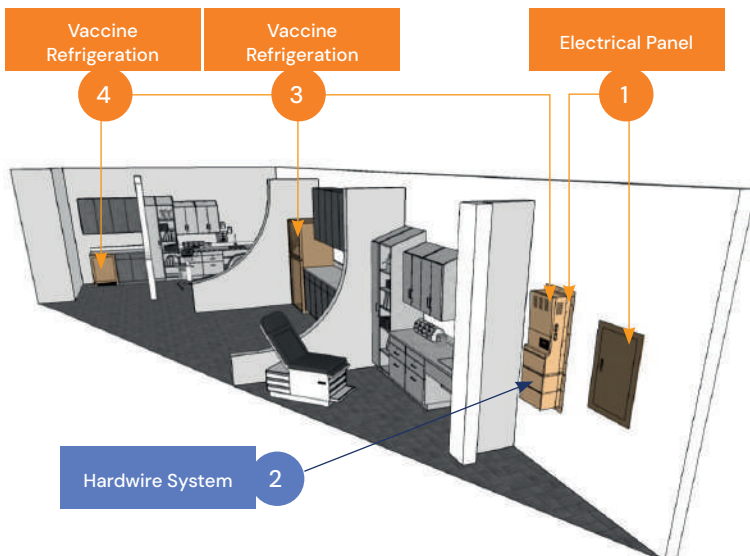

Stand Alone System

- Easy installation
- Minimum floor space
- Plug & play – no wiring
- No permits
- No licensed contractor required
- Ideal for leased facilities

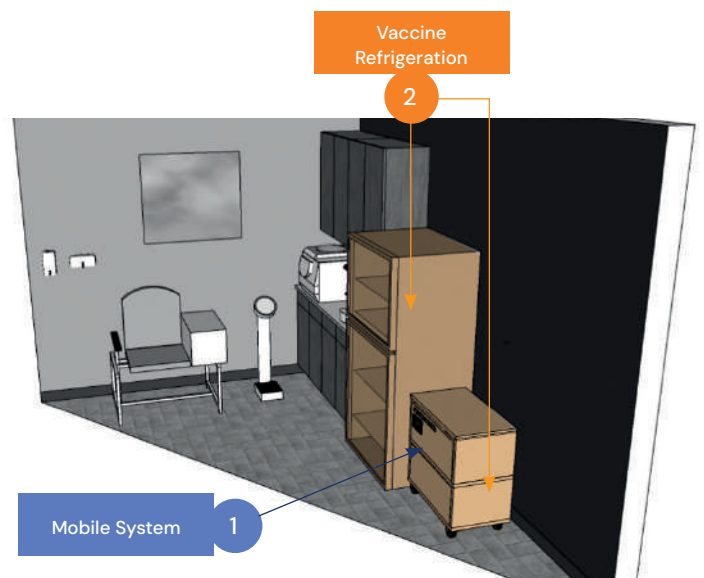

Hardwire System

- Ideal for new construction & remodels
- Can be installed anywhere within the facility
- Powers appliances in more than one room, with one power system
- 4-6 Output branch circuit breakers
- No cords

Mobile System

- No installation required
- Ships fully assembled
- Locking casters
- Plug & play
- No permits
- No licensed contractor required
- Stainless steel – for sterile environments
- Undercounter height
- Top accommodates storage/workspace

Starting out as a bio-medical equipment repair company, Medi-Products has been working inside medical facilities, and servicing the equipment for over 20 years. These years of experience have given us valuable knowledge of the equipment that is used in surgery centers. This knowledge has been invaluable in the design of Battery Backup Systems for these spaces. With an understanding of the different types of equipment and how they are used, how often they are used, how much power they need to run, and how long they are used for, we have a unique edge in the design of systems custom made to power this equipment.

Our experience

- Over 30 years of product and industry experience
- Bio-medical background

Healthcare focus

- Back-up for vaccines and medical refrigerators and freezers
- Back-up support for outpatient surgery centers

The value we deliver

- Trusted brand and reliable products
- Customized solutions
- Innovative space saving design

HERE'S OUR SIMPLE 3-STEP PROCESS:

1 We gather your equipment needs

2 Our experts analyze the data

3 We present you with options
